Thule Awnings & Adapters - Online Fit Guide for Vans and Compact Vans

Go to www.thule.com

Select "Camping & RV" and choose "Motorized awnings" or "Manual awnings"

Choose "Select your Vehicle" on the left, enter the vehicle data and discover the compatible Thule RV products

Thule Adapters - Fit Guide

Before installation

- The installation of the adapter must be carried out by a qualified person
- In case you want to install a tent or a panel, make sure that the adapter is well positioned taking the windows, garage and door opening into account
- Check if you have a solid back ground for the installation of the awning adapter
- The adapter must support the awning at the awnings spring arms for a correct and stable mounting. When this is not possible use a full length adapter
- In order to get a watertight installation, use acid free silicone to fill up the drilled holes
- Always read the installation instructions carefully

Select the right adapter

1 **Vehicle type**

❍ Motorhome ❍ Caravan ❍ Van ❍ Compact Van

2 **Vehicle brand**

Model & Year

2 **Select the mounting location and awning type**

❍ Wall mounting

- Most common installation
- Flat adapter mostly included

❍ Roof mounting

- On top of the vehicle: more space under the awning
- Better integrated design
- Alternative in case of lack of space or width restrictions
- Caravan rail remains free

❍ Rail mounting

TO 1200:
- Easy installation without adapter
- Not permanent

3 **Is there an adapter with brand name available (manufacturer adapter)?**
If not: choose from the universal adapter range

4 **Free space:**

On the roof: Only count the straight space between roof curves for the installation of the adapters

On the wall: Avoid lights and ventilation caps. Make sure the door can open under an opened awning
