Awnings - Fabrics

The top quality PVC fabric used for Thule Omnistor awnings is printed on both sides and has a coating. This coating keeps the fabric colour fixed, watertight, washable and durable. It not only ensures a high degree of scratch-resistance but also increases the UV-resistance and heat-resistance properties.

Welded joints allow a perfect waterproof and longlasting awning.

The Thule Omnistor PVC fabric consists of several layers (see drawing):

- Layer 1 = Top coat of the PVC (protects against scratching and fading)
- Layer 2 = Vinyl with painted pattern
- Layer 3 = High strength polyester scrim
- Layer 2 = Vinyl with painted pattern
- Layer 1 = Top coat of the PVC (protects against scratching and fading)

Our fabric pattern is printed along both sides and over the entire surface (31 & 32)

The fabric can be cleaned using the Thule PVC Cleaner

Depending on the type of awning, you can choose different patterns for your awning fabric:

- 31 Mystic Grey
- 32 Sapphire Blue
- 22 Uni White
- 07 Uni Grey

PERFECT FABRIC TENSION

- Improved stability of the complete awning thanks to the integration of automatic tension rafters in both spring arms
- The tension rafters can easily be locked when maximal tension is reached by turning both buttons in the lead rail with 90°
- The perfect tension is achieved by retracting the fabric with the remote control or hand crank
- The new, more powerful motor improves this fabric tension even more when customers want to combine additional Thule accessories

FEATURES

- Flat adapter delivered as standard. Special adapters for wall mounting need to be ordered separately
- Perfect fabric tension: sturdy spring arms with integrated tension arms ensure a perfectly tensioned awning fabric for increased wind resistance

- Spring arms:
 - reinforced with a double steel cable
- - the automatically deployed tension rafters absorb movement to ensure stability and wind-resistance
- Front profile with integrated drainage system
- Locking system on manual awnings TO 8000: prevents the awning from opening while the vehicle is moving, works automatically when closing the awning
- Optional 230 VAC EM motor with remote control:
 - operate the awning without any effort
 - electronic system ensures a perfect closing of the front profile
 - mechanical settings prevent the awning fabric being rolled up in the wrong way
 - a safety device enables you to operate the awning manually in case of electricity failure
 - can be retrofit installed as an accessory on a manual Thule Omnistor 8000 awning (+ 2.1 kg)
- - possibility to operate with optional wall switch
- Thule Quick-Lock: user-friendly system to help you set up and adjust the support legs to the right heights
