

Thule Adapters - Fit Guide

Before installation

- The installation of the adapter must be carried out by a qualified person
- In case you want to install a tent or a panel, make sure that the adapter is well positioned taking the windows, garage and door opening into account
- Check if you have a solid back ground for the installation of the awning adapter
- The adapter must support the awning at the awnings spring arms for a correct and stable mounting. When this is not possible use a full length adapter
- In order to get a watertight installation, use acid free silicone to fill up the drilled holes
- Always read the installation instructions carefully

Select the right adapter

1 Vehicle type

2 Vehicle brand

Model & Year

3 Select the mounting location and awning type

- | | | |
|---|--|--|
| <input type="radio"/> Wall mounting
- Most common installation
- Flat adapter mostly included | <input type="radio"/> Roof mounting
- On top of the vehicle: more space under the awning
- Better integrated design
- Alternative in case of lack of space or width restrictions
- Caravan rail remains free | <input type="radio"/> Rail mounting
<u>TO 1200:</u>
- Easy installation without adapter
- Not permanent |
|---|--|--|

4 Is there an adapter with brand name available (manufacturer adapter)? If not: choose from the universal adapter range

5 Free space:

On the roof: Only count the straight space between roof curves for the installation of the adapters

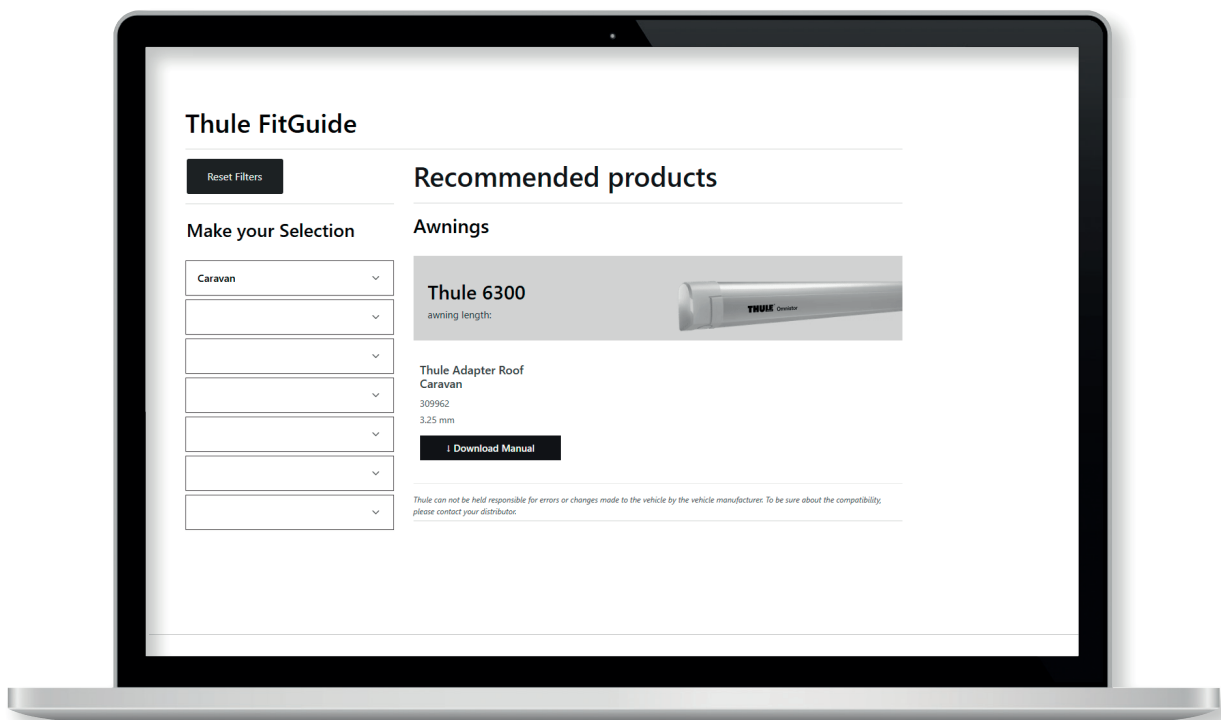

On the wall: Avoid lights and ventilation caps. Make sure the door can open under an opened awning
